## **Acknowledgment**

Larrakia is the name by which the Aboriginal language of Darwin and immediately surrounding areas is most commonly known. However, from the perspective of its own territory, the language is called Gulumoerrgin [goo-loo-murr-ghin]. This dictionary is divided into two parts. One part deals with nouns and adjectives, the other part deals with verbs. This is the first version of the dictionary, and work is currently underway to produce a second version.
