Handover and completion report

Extraction of Structured Information from Dictionary PDFs

Caleb Smith Josephine Paculio Joshua Dib Roger Bernardo

Executive Summary

In response to the tedious process transforming a default dictionary file into a standard electronic dataset an automatic alternative has been developed. The implemented solution for this task is a local web application which allows the user to select a file, display the output, manipulate data, and export the collection.

The structure will first provide the reader with a final overview of the system and an insight into the variations from the original proposal such as the screen designs, and new features that have been developed as the scope grew. In addition, extensive testing will be shown to ensure the system is a complete product followed by outstanding issues the enhance the experience and left to the discretion of the end user to decide how to continue,

This report is paramount to all parties as it provides capstone to the system and finalise all the work that has been completed and the potential areas in which the product can grow.

1. Introduction

A problem in the data analysis and research field had been identified, that being the long and arduous task of converting files into a dataset, in response a solution has been developed to automate this process. This document illustrates how the project has evolved from the initial proposal and lists the changes the design, data, and functions have undergone. Moreover, it will describe any loose ends that can then be followed up or left depending on the desired scope for the future.

Following on from this document the reader will be able to close the project knowing it has been completed and identifies future possibilities.

2. Test Results

Use Case/ Feature	Attach an OCRed pdf file and extract text
Test purpose	To check the accuracy of the program
Expected Results	See Individual Test Data Sets
Success/Failure	Success

Test 1					
		Total number of entries/keyw ords	Actual number of entries/keyw ords collected	Error (keyw ord inside a keywor d)	Error (Incorre ct keyword /s)

Bug 2 – Special characters

- When the program encounters a special character, it will ignore all the remaining text including the special character within the same line.

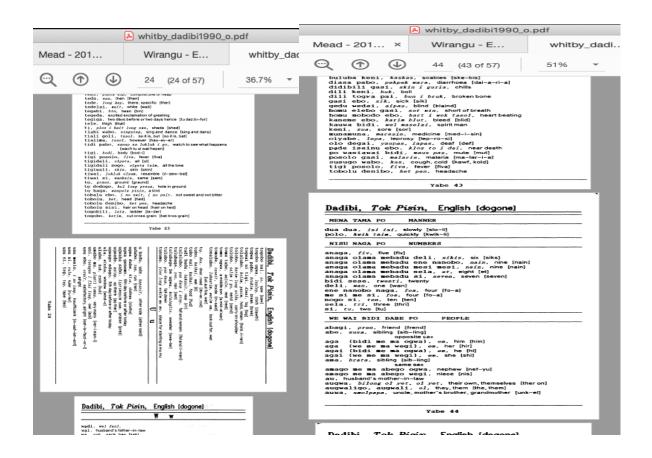

Bug 3 – Column 2 is read first before column 1

- The program will not have correct results if the pdf file's column 2 is read first before column 1. The program will not detect if column 2 is read first before column 1.

Bug 4 – Different page sizes and orientation

- The program will not detect if the pdf file has different page sizes and orientation. The program will not have accurate results as it depends heavily on difference in indentation between the keyword and related text.

Bug 5 – Header and footer

The program will treat the "A" in the first page as the header since it is the highest text/string. Because "A" is treated as the header, its y-coordinate will be used as a starting point to trim the remaining text above it. This will then result in an inaccurate result because some of the keywords and related text in the second page will be deleted because it got the same or higher y-coordinate as the "A".

verbal prefix: actor third person singular and plural/ awalan kk untuk pelaku persona ketiga tunggal dan jamak. (WL.25)
 I verbal suffix: subjunctive/ akhiran kk.: semoga, mudah-mudahan. mataua ingkoo – that you may know!/ mudah-mudahan engkau tahu!
 II verbal suffix: object third several.

semoga, mudah-mudahan. mataua ingkoo that you may knowl/ mudah-mudahan engkau tahu!

II verbal suffix: object third person singular
and plural/ akhiran kk: obyek persona ketiga
tunggal dan jamak. (WL. 27)
an interjection expressing disbelief: you don't
mean to say so! what makes you think so? I
can't believe it/ tidak mungkin! bagaimana
bisa? saya tidak percaya!

'aabhidi (A) ks pious, devout/ saleh, alim.
'aabhidi (A) ks just, righteous/ adil, berbudi.
sagoria soon, before long/ segera, tak lama lagi. brh. agori, agoagori, kaagoago, maago.
aaherati (A) kb hereafter, world to come/ akhirat, alam baka.
ashiri (A) I. kb end, conclusion/ akhir, penutup, 2. last, final/ terakhir, penghabisan.
aai I don't knowl saya tidak tahu! i agoi alingka o andimu, Ati? Aai! — where has your
brother gone, Ati? I don't knowl/ Adikmu
pergi ke mana, Ati? Saya tidak tahu!
'aakili (A) ks baving the full use of one's reasons, of sound mind, sensible, responsible
for one's actions/ akil, berakal, bertanggung
jawab atas perbuatannya.

'aalimu wara'a — pious scholar/ ahli agama yg saleh. Jm. 'ulamaa.
'aarifu (A) wise person, sensible, intelligent/
orang bijaksana, arif, berpikiran sehat. 'aarifu kaamili — wise and pious man/ orang yg
bijaksana dan saleh.

aba I kb k.o. fish/ sb. ikan.

II kkt ask (a question)/ menanyakan. brh.
poabauka, poabaki, poabakia.

abaak kkt ask (somebody), ask from/ bertanya
kepada (seorang), brh. (s.d.a.).

abaki kkt ask (somebody), ask from/ bertanya
kepada (seorang), brh. (s.d.a.).

kan. brh. (s.d.a.), abaki kkt ask (somebody), ask from/bertanya kepada (seorang), brh. (s.d.a.), abha (A) father (term of address), daddy/ba-

pak (panggilan), ayah.

abhijadhi (A) alphabet/ abjad, alfabet.

abi kkt regard as, treat as/ menganggap (sebagai), memperlakukan (sebagai). aabiaku kantilena – they regard me as their slave/ mereka menganggap saya sebagai budaknya (expression of modesty/ pernyataan keren-

dahan hati), saro abina - surname, nick-

dahan hati). saro abina – surname, nickname/ nama panggilan.

ada kkt borrow/ meminjam. ada i – borrow
from/ meminjam dari. kuada dhoi i amaku –
I borrow money from my father/ saya meminjam uang dari ayah saya. brh. paada,
paadaaka, poada, poadaada.

adari kkt teach, train, break in (a horse)/
mengajar, melatih, mendidik. brh. kaadari,
pengkaadari, pengkaadariaka.

ade kb chin/ dagu, ade bingku – prominent
chin/ dagu yg menonjol.

'adhabhu (A) kb punishment by superior order, punishment from God or from the sultan, supernatural punishment/ penyiksaan
dari Allah atau dari Sultan, penyiksaan gaib.

'adhati (A) kb adat, custom, customary law,

'adhati (A) kb adat, custom, customary law, manners/ adat, adat-istiadat, kebiasaan, tatakrama. matau 'adhati - be well-mannered, well-educated' sopan, tahu sopan santun. inda matau 'adhati - ill-mannered, impertinent/ kurang ajar, tidak sopan. brh. ko'adhati.

anan. dhedhé' exclamation of pain or sorrow: ow! ouch! ah! alas!/ scruan sebab sakit atau se-dih: aduh! aih! ah! brh. dhedhé'.

dih: aduh' aih! ah! brh. dhedhe'.

adi particle of interrogation: exactly, ever/ kata penambah dalam kalimat tanya: adi tua apa? – what ever is the situation? what exactly is the matter?/ bagaimana gerangan itu? ae kb leg, foot, paw, lower course (of a river), river-mouth/ kaki, cakar, hilir, muara. kanna ae – toe/ jari kaki. randana ae – foot-sole/ tapak kaki. brh. koae.

aenti (A) kb Koran verse/ ayat Quran.

aebhu (A) kb blame, reflection, defect, shortcoming, disgrace/ kesalahan, cacat, ab, malu, arang di muka, celaan. brh. i'aebhuaka, ka'aebhu, pa'aebhu.

aebhuaka kkt put to shame/ memalukan. brh. (s.d.a.).

(s.d.a.). aeriloji (MI) kb watch/ arloji. bdk. ariloji, aro-

loji.

agama (MI) kb religion/ agama.

ago kkt help, save/ menolong, membantu,
menyelamatkan, mencegah. brh. kaago.

agoagori kkt hasten, speed up, accelerate/
mempercepat, mencepatkan, melajukan.

brh. agori, kaagoago, maago. bdk. aagoria.

agoi kkt steal, rob of, purloin, pinch, pilfer,
appropriate dishonestly, misappropriate,
take by force/ mencuri, merebut, merampas,
merampok, mengambil dengan kekerasan

senjata, menggelapkan. agoi parintana balusenjata, menggetapkan, agot parinana batu-wu o peropsa - take by force the highest power in the state, commit a coup d'état/ me-rebut kekuasaan negara dengan kekerasan, melakukan kudeta brh. mangaagot, poagot, agori kkt do hastily, do speedily, speed up/ melajukan, mempercepat, bikin lekas-lekas.

mu: istilah penunjuk untuk orang berpangthat inggi yg lebih tua daripada yg ditegur.

atampuaku akamiu Bontona Baluwu – I was
ordered by the honorable B.B./saya disuruh
Yang Mulia B.B. andimiu akamiu – his highness (used when it is not certain that the person referred to is older or younger than the

5. Outstanding development work/Further improvements

Due to time constraints, certain features have not been fully developed and have not been included in the final version of the project.

- Performing an extraction on PDF files that have not been read through OCR. At present the program is only able to extract the content of files which have been OCR-ed.
- Multiple file upload and extracting from multiple PDF files. This has been supplemented by the addition of tabs
- Saving the current state of the program. This feature will allow the user to save and resume existing table results.

6. Conclusion

Upon concluding this document there are several key takeaways including an understanding of how the project has evolved from the early stages of development, the testing of the system, and remaining tasks for the future.

Following on the end user will be provided with an end product and resources to continue progress in the future.
